

6th edition of the Luxembourg Photo Festival

photomeetings luxembourg 2010

Workshops - Lectures – Exhibitions

Symposium from September 7th-11th, 2010

THEME 2010: "magazine photography"

After five years, Luxembourg's photo festival has established itself in the heart of Europe as both an attractive and respected meeting platform for photographers, photo-artists, photo-theoreticians and of course also photo-amateurs from around the globe. With their exciting themes, the ***photomeetings luxembourg*** are right at the heart of contemporary discourse. The 6th edition of the festival focuses on the theme "**magazine photography**"

Between 7th-11th September 2010, internationally renowned photographers, photo-artists and lecturers highlight and discuss the practical and theoretical issues of making photo magazines today by way of workshops, lectures and exhibitions. As in previous years, experts will lecture during the symposium. **All events are aimed equally at professional photographers, photography specialists, and students, as well at interested amateurs and photography lovers.**

"magazine photography" is closely related to editorial photography as its base. The definition of editorial photography centres on images that depict real world and fantasy issues with an emphasis on "telling the story" in picture form. **The aim of this edition of *photomeetings luxembourg* is to produce pictures that show a process or enlighten a viewer and illuminate what words cannot communicate.**

This theme provides a variety of workshop possibilities based on the structure of magazines today (portrait, architecture, reportage, photojournalism, fashion...). The festival will highlight different controversial aspects of magazine photography, for example by lectures about copyright issues and discussions about practical questions like possible ways of publishing one's work in magazines etc.

Europe learning together: 8 universities and colleges from 5 European countries will take part in *photomeetings luxembourg*.

As a European cross-border project, 2010 will see **60** students from the photography, video and media departments of these colleges raising questions and creating on the basis of magazine photography. 7-10 students from each university are participating. They will work on the theme during the summer semester 2010 and their resulting photographs will be presented in an exhibition within *photomeetings luxembourg 2010* at the "Konschthaus beim Engel".

photomeetings luxembourg 2010 in short
